Objectives:

- Gain meaningful facts related to trauma etiology, assessment and management for both adult and pediatric patients.

- Compare and contrast fever and heat illness, heat exhaustion and heat stroke, and exertion versus classic heat stroke.

- Identify key principles and resources for victims of thermal burn and trauma during pregnancy.

- Review principles of trauma management utilizing interactive case studies.

- Identify strategies for immediate intervention in acute mental crisis.

- Identify an available resource for patients / families in need of acute or post-acute therapies.

- Acquire insight into injury recovery from the patients’ perspective.
